**Letter of recommendation**

Altdorf, 29. January 2020

**Dear Sir or Madam**

Flexico is a European, globally active manufacturer of resealable plastic bags and profiles. Today, the Flexico Group develops and manufactures packaging and places great importance on environmental compatibility and sustainability.

Since 2017, we have been cooperating with the company AP Fachübersetzungen on a regular basis. In the course of this cooperation, we have commissioned them with the translation of various specialized texts, such as powers of attorney, privacy policies, contracts on processing, quality assurance agreements, commercial register extracts, general terms and conditions and a PowerPoint presentation on sustainable packaging solutions, from French and English into German and vice versa.

AP Fachübersetzungen has always delivered the highly specialized translations within the agreed deadline or even earlier and the quality has always met our high requirements. We are also extremely satisfied with their contactability, fast response to inquiries and quick availability. We would therefore entrust AP Fachübersetzungen with the translation of our documents again at any time and can only warmly recommend their services.

Best regards

René Pöhner
