Letter of recommendation

A&M STABTEST GmbH is a specialist in the pharmaceutical analysis of small molecules as well as biomolecules and one of the largest GMP service providers for pharmaceutical analytics in Europe.

For 25 years, our company has stood for highest quality analytics, transparency towards our clients and authorities as well as for a fair and reliable cooperation with our team.

In February 2021, AP Fachübersetzungen was commissioned with the live interpretation of a four-day remote GMP inspection by the Belarusian national supervisory authority. When we were looking for an interpreter with relevant GMP experience, AP Fachübersetzungen was recommended to us by one of our major clients who had already had a very positive experience with AP Fachübersetzungen during an inspection. A&M STABTEST was able to rely on Mr Alexander Podarewski and his team to provide their services and support quickly and smoothly. Even the request for an additional interpreter at short notice due to the scope of the inspection was fulfilled by AP Fachübersetzungen without any issues.

Prior to the inspection, we were already able to establish a very good cooperation in the translation of documents and coordination with the Belarusian supervisory authority. AP Fachübersetzungen also used these documents to prepare specifically for the topics of the inspection.

The inspection was then interpreted simultaneously on site by Ms Elena Alenina and Mr Podarewski in an extremely professional and discreet manner across the entire spectrum of GMP topics: from logistics and receipt of samples to storage and analytics as well as OOX processing, method validation, SOPs, training, air conditioning, equipment qualification or validation of computerized systems.

The interpreters were always able to fluently and quickly translate technical content, and were also not afraid to ask questions in the case of complicated matters in order to interpret them correctly and faithfully.

This established a pleasant working atmosphere between the inspectors, the interpreters and the A&M STABTEST team throughout the inspection, and all issues were addressed to the inspectors' absolute satisfaction.

The inspection was ultimately completed without any findings on the inspectors' part and A&M STABTEST's compliance with GMP requirements was fully acknowledged, to which AP Fachübersetzungen contributed significantly.

A&M STABTEST was extremely satisfied with the service provided by AP Fachübersetzungen based on the mentioned factors. We can recommend the services offered by AP Fachübersetzungen without reservation.

A handwritten signature in blue ink, appearing to be 'B. Kümer', is written over a horizontal line.
